Summary

Aspiring Full Stack Developer with expertise in HTML, CSS, JavaScript, React, MySQL, and Java. Skilled in building responsive web interfaces, working with APIs, and leveraging Git/GitHub and AI-based tools for efficient development and debugging. Quick learner with strong problem-solving abilities and a keen interest in modern full-stack technologies.

Skills

- **Programming Languages:** *C, Python, Java, JavaScript.*
- **Framework/Tools:** *React.js, Bootstrap, Node.js, Spring Boot, Hibernate, REST APIs.*
- **Databases:** *MySQL, PostgreSQL, Hibernate.*
- **Product Management:** *Agile Methodologies, Event-Driven Architecture, Data Parsing via APIs.*

Projects

Puncture.in (Web Application)
Tech Stack: *HTML, CSS, JavaScript, Bootstrap, MongoDB*

Developed a web platform for car service bookings, including maintenance, repairs, and cleaning. Implemented user authentication & database management using Node.js and MongoDB. Designed a responsive and interactive UI with Bootstrap and JavaScript. Integrated booking system & admin panel for efficient service tracking.

EARS (Employment Application Review System)
Tech Stack: *HTML, CSS, JavaScript, Bootstrap, React.js*

Developed a system to automate the screening of job applications using predefined criteria. Implemented algorithms for resume parsing, candidate ranking, and eligibility filtering. Integrated a user-friendly interface with React.js to allow recruiters to assess applications efficiently. Improved the hiring process by reducing manual effort and enhancing decision-making speed.

Education

Master of Computer Applications
Sinhgad Institute of Management, Pune — *2025-2027*

Bachelor of Science in Computer Science — *CGPA:9.02*
Samarth College of Computer Science — *2022 – 2025*

Certifications

- **Data Analytics Job Simulation**
- **Technology Job Simulation**
